**Rooted in raw emotion and powered by a love for live performance, Koz delivers a high-octane blend of rock, blues, and country. The project is led by a lifelong musician who's been singing and playing since the age of 10, and performing live since 2002.**

Matt (Koz)lovac's story begins in a basement, with a dusty Fender Lead II that once belonged to his father. "Once I figured out how to open the sliding locks on the case," Matt recalls, "I was hooked." Music quickly became more than just sound — it was a way to connect with emotions, make sense of the world, and bring people together. That sense of connection is what continues to fuel Koz's performances today.

Koz's sound defies easy categorization — a reflection of the diverse influences that shape it. Drawing from the grit of Tom Petty, the soul of Paul McCartney, the swagger of the Allman Brothers, and the fire of Led Zeppelin, Koz has developed a style that's been described as Indie Blues Rock — though nothing quite captures it. And that's the point.

Since releasing original music in 2023, Koz has made waves in the Western PA music scene with high-energy sets and emotionally charged songwriting. The band has been featured at regional festivals including Picklesburgh, Millvale Music Festival, and Northside Music Festival, while also performing throughout the greater tri-state area.

With their latest single, "Love" (May 2025), Koz continues building momentum — promoting the track through local radio (92.9FM, 102.5FM, and 97.9FM in Butler, PA) and grassroots social media efforts.

**Koz is setting sights on expanding into new markets and festival circuits, aiming to introduce their sound to a wider audience. Whether it's opening for bigger local or national acts, or headlining intimate venues, the mission remains the same: to bring people together and blow the roof off — no matter the size of the stage.**
